Kerio Technologies recognizes HumanIT as its first Preferred Partner in Canada offering SMB groupware and security solutions

Montreal-based Value Added Reseller awarded for success in selling and supporting Kerio MailServer and Kerio WinRoute Firewall.

Santa Clara, Calif., May 24, 2007 – Kerio Technologies Inc. has awarded HumanIT, a leading Montreal solution provider, Kerio Preferred Partner status. HumanIT, which provides SMB and enterprise-class services and solutions on heterogenous platforms, has made great business out of selling Kerio's messaging and firewall products against similar offerings from Microsoft and other competitors.

"Despite being small businesses, our customers are heavily dependent on technology," says Stephan Pinheiro, principal at HumanIT. "We have had great success by working within our customers' means and offering a low maintenance and cost efficient alternative to the more resource intensive Microsoft Exchange option. *"When the time came to replace our mail server, HumanIT's tailored proposal introduced us to Kerio MailServer – a valuable alternative that cost less to own and maintain without compromising on features and performance."* says Christian Goulet, Production Director for the daily newspaper, Journal Le Devoir.

Through its integration of WebMail, anti-spam, anti-virus, backup, archiving and user management, Kerio MailServer is a complete solution for most small and medium-sized organizations. Kerio MailServer runs on Linux, Mac OS X and Windows and supports both Microsoft Outlook and Microsoft Entourage as groupware clients. Kerio MailServer also provides true push email for Windows Mobile devices and the latest ActiveSync-enabled Treo smartphones from Palm. Both the WebMail client and the Administration Console of Kerio MailServer are available in English, French, Spanish and a variety of other languages.

“HumanIT has become our go-to partner in Eastern Canada,” says Peter Felgentreff, VP Worldwide Sales at Kerio Technologies. “They demonstrate a true dedication to customer care and they really add the *value* in Value Added Reseller. They are exactly the type of company our partner program is designed for.”

The Kerio Business Partner program targets IT resellers that build solutions around unique software solutions and services, and offers comprehensive benefits such as qualified leads, online resources and training programs – as well as competitive margins.

About Kerio Technologies Inc.

Innovating in Internet security since 1997, Kerio Technologies Inc.
